

Online Participation to HFM 2022

I joined the International Conference on Highly Frustrated Magnetism 2022, which was held in hybrid in Paris and online. I present the online poster entitled “SmI₃ as an antiferromagnetic Kitaev material”. We used the “Gather” platform for the presentation. While it was a little bit disappointing that not so many people gathered on the session, it was a good opportunity to join the conference and have discussions.
