

Defense and intermediate-term presentation for master thesis

The defense and intermediate-term presentation for the master thesis of the Graduate School of Frontier Sciences (Advanced Material Science) were held on January 30 and 31.

Defense

Kento Yamamura 「Magnetic field induced insulator metal transition of W-doped VO_2 」

Jinbo Wang 「Exciton states of Cu_2O in ultrahigh magnetic fields」

Intermediate-term presentation

Yulin Guo 「Optical absorption spectra of a microbial rhodopsin in ultrahigh magnetic fields」

Kaiyang Huang 「Magneto-absorption spectroscopy in van der Waals antiferromagnet NiPS_3 」
