

# Presentations in Workshops

---

During the past month, Tokunaga-Lab. members, Dr. Miyake and Dr. Mitamura gave presentations at domestic workshops.

Dr. Miyake gave a talk entitled “Study of magnetism of Tb-based approximants using a pulsed-magnetic field” at the “9th Hyper Material Meeting” held at Kobe Portopia hotel.

Dr. Mitamura gave an oral presentation titled "Dielectric observation of spin 'chirality' in perfect triangular lattice antiferromagnets" at the ISSP workshop "New developments in chiral material science" held at the Institute for Solid State Physics, the University of Tokyo.
