

# New season started

---

Dr. Masaki Kondo newly joined Tokunaga Lab. as a post-doc scientist. Here is a message from Dr. Kondo.

“My name is Masaki Kondo, and I have just been appointed as a PD in Tokunaga Lab. I worked on synthesis and transport measurements of magnetic topological materials at Hanasaki/Sakai Lab. at Osaka University. I want to contribute to developing new high-field physics by combining my synthesis technique. I also would like to participate in soccer at noon. I look forward to working with you.”

Not only the newcomer but our group members also study actively. Dr. Yuto Kinoshita's work on field-induced insulating states in BiSb was published below.
