

JPS meeting @ Tohoku Univ.

Many of our group members will participate in the JPS meeting to be held at Tohoku University on September 16-19. From Tokunaga Lab., Dr. Kinoshita will give an oral presentation on “Magneto-optical imaging under steady high magnetic field and pressure using a diamond anvil cell” (17aB103-5) and Dr. Kondo on “Variation of the polar structure and the spin-valley coupling in layered Dirac metal $\text{Ba}_{1-x}\text{Sr}_x\text{MnBi}_2$ ” (16aA106-3). Seven other oral presentations will be also given in this meeting. If you are interested in the state-of-the-art of research using the high magnetic field facilities at ISSP, please come to the meeting.
