

Two workshops on high fields

Some members of the Tokunaga group made presentations in two high magnetic field conferences from December 4 to 8.

At the workshop related to the 1000 T project held at the University of Electro-Communications, Dr. Masaki Kondo received the Poster Award for his presentation on "Element substitution effects and high field transport properties in polar Dirac electron system BaMnBi_2 .

Dr. Akiyoshi Yamada received the Best Presentation Award for Young Scientists for his presentation on "Non-equilibrium-Equilibrium Crossover in Magnetotransport Phenomena" at the High Magnetic Field Science Meeting held at Tohoku University.
