

Joint research with Prof. Her: multiferroics

At the beginning of the year, I had a research meeting with Mr. Kim-Long Her from Chang Gung University in Taiwan.

At the beginning of the year, we had a discussion via Zoom on January 2nd. Chiu-kun also participated.

About 16 years ago, Dr. Her became Matsuda Lab's first postdoctoral fellow and stayed there for about two years. Recently, he seems to be busy and has not been able to come to the ISSP for doing experiments, so I am planning to conduct the experiments by Matsuda lab members here with the cooperation of the Kindo and Tokunaga laboratories.
