

Maintenance of electro-magnetic flux compression system Mini-workshop in Matsue (Shimane)

Maintenance of electro-magnetic flux compression system was done.
Important points for experiment (electrode, collector plate etc) were checked.

We (Prof. Matsuda, Ishii, Chiu) participated in
Mini-workshop of A01 1000 T science

「magnetic field effect on the physics of electron-lattice interaction and
metal-insulator transition」

held in Matsue-city (Shimane prefecture).
