

Meeting of Asymmetric quantum matters

The meeting related to the grant-in-aid for transformative research area (A), asymmetric quantum matters, was held in Kyusyu institute of technology at 1/5 and 6. Dr. M. Kondo presented the poster titled “Nonreciprocal transport dependent on spin-valley coupling in polar Dirac metal BaMnX_2 ($X=\text{Sb, Bi}$)”. This work represents the joint research with Osaka Univ. and IMR., Tohoku Univ.
