

Seminar

Date: April 5, 2012

Title: time-resolved measurements on the vicinal Bi(114) surface] Dr.Dominik Leuenberge the University of Zuerich, Switzerland

Speaker: Dr. Kenichi Ozawa (Tokyo Tech)

(ISSP Lectures by Visiting Professors)

Date: April 19, 2012

Title: Element specific analysis of magnetic using synchrotron soft x-rays.

Speaker: Dr. Tetsuya Nakamura (JASRI)

(ISSP Colloquium)

Date: May 31, 2012

Title: Element-specific analysis of electronic states developed by soft X-ray emission spectroscopy.

Speaker: Dr. Yoshihisa Harada (ISSP)

Date: November 16, 2012

Title: Experience in SLS

Speaker: Dr. Masaki Kobayashi (The University of Tokyo)

Date: February 18, 2012

Title: Spin State in Metals studied by SX-ARPES

Speaker: Dr. Jun Miyawaki (ISSP)

Date: February 25, 2012

Title: Local atomic orbital analysis and selective excitation by photoelectron diffraction spectroscopy

Speaker: Dr. Fumihiko Matsui (NAIST)

Date: March15, 2012

Title: Local electronic structure of nano-materials studied by three-dimensional scanning photoelectron microscope (3D nano-ESCA)

Speaker: Dr. Koji Horiba (KEK)
